

**Press Release: April 3, 2008**

**Breaking News from EPA! EfferSan is now an accepted disinfectant.**

Activon, Inc. of Beaver Dam WI, announces the expanded Effersan five minute EPA disinfectant label. The highly effective, economical tablet disinfectant, sanitizer and odor protection product is accepted for use in breweries, beverage and food processing plants, schools, hospitals, nursing homes, hotels, amusement parks, child care centers, restaurants, spas, hot tubs, veterinary clinics, zoos, milk processing facilities, dairy farms, poultry premises, livestock quarters, office buildings, industrial facilities, homes, camp sites, marine and recreational vehicles, kennels, boarding facilities, laboratories and lab animal facilities.

Effersan effectively disinfects in 5 minutes against *Pseudomonas aeruginosa*, *Staphylococcus aureus*, *Salmonella enterica* on precleaned, hard, nonporous surfaces.

Effersan effectively sanitizes in 1 minute against *Salmonella typhi* on precleaned, hard, nonporous surfaces.

New claims for a boot rinse and general premise sanitation for all livestock production facilities means a broad adaptation for Effersan throughout the animal production and food processing industries.

A full description of EfferSan uses is available at [www.activon.com](http://www.activon.com) or by calling 800-841-0410
